

The screenshot displays the 'Editing Wired connection 1' dialog box in the Ubuntu 12.04 LTS network settings. The dialog has a title bar with a close button and the text 'Editing Wired connection 1'. Inside, the 'Connection name' field is set to 'Wired connection 1'. The 'Connect automatically' checkbox is checked. Below this are four tabs: 'Wired', '802.1x Security', 'IPv4 Settings', and 'IPv6 Settings'. The '802.1x Security' tab is selected, showing a 'Use 802.1X security for this connection' checkbox which is unchecked. Underneath, the 'Authentication' dropdown menu is set to 'MD5'. There are empty text input fields for 'Username' and 'Password'. Below these are two more checkboxes: 'Ask for this password every time' (unchecked) and 'Show password' (unchecked). At the bottom of the dialog, the 'Available to all users' checkbox is checked. To the right of the dialog, there is an 'Options...' button. In the background, the 'Network' settings window is visible, with the 'Wired' section selected and an 'ON' toggle switch.
